

SHORLITE LITE™

SIMPLE ROBUST ALUMINUM

You are also given the flexibility of making a 2, 3 or 4 sided system to suit your needs up to 12' tall and 7' long

Accessories

Spreaders - Durable 3" Schedule 40 pipe.

Double Action Screw Strut - Screw out the struts in the trench for easy shoring. Easy to utilize and highly effective.

Wheel Kits - Suspend the shield and easily roll it along the top of the trench.

Leg Kits - Clamps on the bottom of the end caps at each corner giving you a 24" lift off the bottom of the trench.

Square Connectors - Can easily be attached to convert a two-sided box to a three-sided and(or) four-sided box.

Kits come equipped with standard required connectors

3' tall Kits require 4 Spreaders, Screw Struts, or 8 Square Connectors

6' tall Kits require 6 Spreaders, Screw Struts, or 12 Square Connectors

MAKES SPOT REPAIR EASY

The Shorelite Lite™ modular aluminum shielding / shoring system is built strong yet light enough to be assembled by hand. P.E. Certified to meet O.S.H.A. requirements for a shielding and or shoring.

EASY STORAGE

Lightweight & Modular, these panels can be stored in a small space and easily transported in a pickup truck or van.

FAST ASSEMBLY

Easy to assemble and fast to install. Single profile 2.5" stackable panels come 3' high and various lengths. Two men without the assistance of a tractor backhoe can easily do assembly of the Shorelite Lite™.
